

HARIS FAHIM GABA

Web Developer

Karachi, Pakistan | 0334-2449599 | fahimgaba9@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Web Developer with hands-on experience building and customizing WordPress and Shopify sites, and developing backend applications with ASP.NET Core and Entity Framework Core. Comfortable across the stack — from client-facing CMS builds to structured backend logic and databases. Currently expanding into AI-assisted development workflows to speed up debugging and prototyping.

PROFESSIONAL EXPERIENCE

Junior ASO Manager

Nov 2025 – Present

Appware Technologies | Karachi, Pakistan

- **Technical support for app listings:** used HTML/CSS and basic scripting knowledge to help audit and troubleshoot app landing pages and store assets. [Insert: any concrete technical task you actually did here — e.g. fixed a landing page, built a tracking snippet.]
- **Cross-functional collaboration:** worked alongside marketing and product to align technical listing requirements (metadata formatting, asset specs) with growth goals.
- **Process documentation:** [Insert: any workflow, checklist, or tool you built or used to make ASO tasks more repeatable — even something small counts, e.g. a keyword tracking spreadsheet.]

Note: this role is marketing-focused. Keep it on the resume for continuity of employment, but keep bullets short and don't oversell it — your web dev work below is the section that should carry this application.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive Web Development

Backend: ASP.NET Core, C#, Entity Framework Core, SQL Server

CMS & E-Commerce: WordPress, Elementor, Shopify, Shopify Theme Customization

Tools & Workflow: Git basics, AI-assisted debugging and prototyping

PROJECT WORK

- Built and customized [N] WordPress/Shopify sites for small business clients — [insert scope: product count, page count, or turnaround time per site].
- Developed a [specific app/tool name] using ASP.NET Core and Entity Framework Core, with [insert scale — number of database tables, records handled, or core features implemented].
- [Insert a third project if you have one — even a small personal or practice project counts if you can explain what it does and one technical decision you made.]
